

What services does iCast offer?

ICAST offers multiple solar services and programs to suit your needs. One of our goals is to provide solar energy to low-income residents living in multifamily housing, which we do through community and multifamily solar.

What is the iCast resource guide?

ICAST has created a Resource Guide meant to help MF owners and managers, policymakers, regulators, utilities, energy efficiency program implementers, and affordable housing stakeholders overcome the barriers to deploying VHE technologies in MF properties.

What is iCast & how does it work?

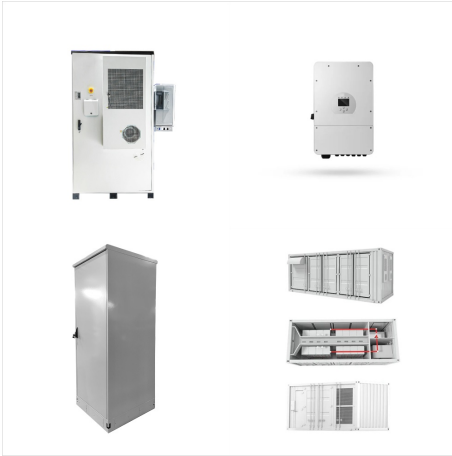

iCAST is an innovative regulatory requirement that does not just rely on a strategy that is focussed on Penetration Testing alone. The focus of the iCast framework is to deliver a Threat Intelligence based scenario test, with the testing element focusing on 'Red Teaming'. The Threat Intelligence phase focuses on: Reviewing and Defining Stage

How can iCast help you?

Through efficiency improvements and resident education programs, ICAST can help you shift energy consumption and money. ICAST's Carbon Credit Project monetizes the value of carbon dioxide (CO₂) emission reductions achieved through our green, whole-building retrofits for multifamily (MF) housing in order to fund future projects.

ICAST facilitates online learning, on-the-job training, and employment connections for the energy efficiency workforce. Supporting the evolution of the HVAC industry and meeting the needs of the beneficial electrification movement necessitates good training opportunities for workers at all experience levels.

Experienced Energy Specialist with a demonstrated history of working in the higher education and energy industries. Skilled in Lecturing and Energy Planning & Policy Analysis. iCast 2024 Secretariat Office : Jl. Gegerkalong Hilir, Ciwaruga, Kec. Parongpong, Kabupaten Bandung Barat, Jawa Barat Conference & Exhibition.

At Troy, ICAST did a design for a net-zero energy rehab that included highly efficient heat pump systems and solar. More Money for WAP Malhotra also wrote a piece on weatherization for Tax Credit Advisor in the August 2022 issue. He wrote that the Bipartisan Infrastructure Law (BIL) provided \$3.2 billion to the WAP (on top of the original ~\$1.6

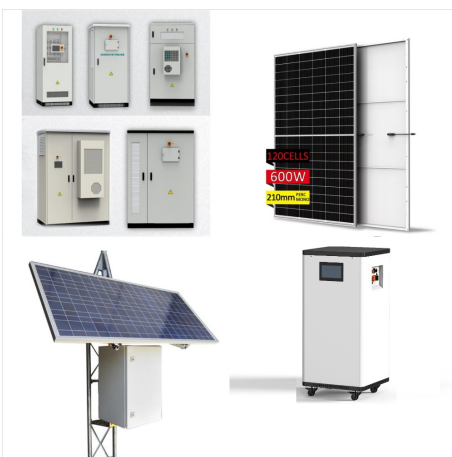

This case study addresses multifamily energy upgrade experiences by two members of the Better Buildings Residential Network???Elevate Energy and the International Center for Appropriate and Sustainable Technology (ICAST). Elevate Energy is a nonprofit organization that designs and implements efficiency programs that lower costs, protect the

A multifamily property energy assessment is the first
step to determining how much energy the property
consumes and evaluating the measures that can be
taken to make the property more energy efficient.
An energy assessment will identify where the
property is losing energy and may save significant
amounts of money over time when corrected.

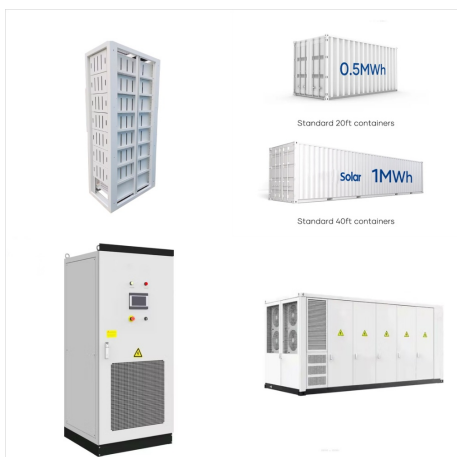

ICAST is implementing the BENEFIT (Buildings
Energy Efficiency Frontiers & Innovation
Technologies) project with the U.S. Department of
Energy (DOE), Office of Energy Efficiency and
Renewable Energy (EERE) to train the next
generation of heat pump HVAC technicians.

? The US Dept. of Energy (DOE) recently released its 2024 Progress Report for the Better Buildings initiative???an annual publication that highlights the achievements of the initiative and its partners by sector. The Better Buildings initiative (BB) aims to improve energy efficiency and advance decarbonization across the nation's various building sectors.
