Join us and play your role in a leading green energy company! Ignitis Renewables is a part of Ignitis Group, thus it follows the common strategy of the Group. We are an international green energy company in the three Baltic states and Poland. Our objective is to develop a green and flexible electricity generation portfolio.

Will RE be a part of the Gambia's energy future?

The Gambia has already started this process by setting up a strong policy that includes RE as part of its energy future. It is in the process of building the institutional and legal framework that will help to deliver this promise.

Is RE a solution to energy problems in the Gambia?

Policy makers across Africa have been among the last to embrace RE as a solution to their energy problems. They are often locked into crisis management on a day-to-day basis. The country's policy makers need to be persuaded that RE has a real future in the energy mix of The Gambia. They need to demonstrate this by their actions.

Does the Gambia have a wind-related energy project?

There is limited experience in wind-related energy projects in The Gambia. Much of the early work was restricted to village water pumping projects. In the 1990s, the Department of Water Resources (DWR) actively promoted the use of wind pumps along coastal villages with support from the EU.

Creating an anti-corruption environment. Ignitis Renewables, as part of the Ignitis Group, adheres to the Group's Anti-Corruption Policy. The Group aims to operate responsibly and sustainably, therefore it has zero tolerance for any form of corruption in its daily operations and advocates for fair business practices and transparent communication with all stakeholders.
