

Will Indonesia's energy transition be a good idea?

Evidence suggests that Indonesia's energy transition should be well under way. The government has set a target to support renewable energy development in the New Energy and Renewable Energy Bill through increasing on-grid renewable capacity, converting diesel power generation to solar and expanding rooftop solar.

Will Indonesia see a boom in renewables?

Indonesia has not yet seen a boom in renewables, resulting in fossil fuels meeting its electricity demand growth. The National Energy Policy (NEP) 2014 set a target of 23% of renewables in the energy mix by 2025, however, this target is likely to be reduced to between 17-19% in the revised NEP currently being developed.

How will Indonesia's New NEP affect the energy sector?

The revised NEP, expected to be released this year, will reduce the renewable energy target from 23% by 2025 to between 17-19% in the energy mix. As a result, Indonesia's climate commitments in the energy sector may progress slower than previously anticipated.

Is it time to act on renewable electricity in Indonesia?

For Indonesia, it's time to act on renewable electricity. Doing so will help the country stay competitive. Large global businesses are looking for more ambition and greater investment in renewables in Indonesia, so that they can confidently up their investment in renewables in support of their RE100 targets.

What is RE Invest Indonesia?

What is RE Invest Indonesia? RE Invest Indonesia is a multi-stakeholder platform established by Tenggara Strategics in cooperation with the Centre for Strategic and International Studies (CSIS) to bring together renewable energy players from Indonesia, China, Japan, and South Korea.

Can Indonesia achieve net-zero energy ambitions?

As a result, Indonesia's climate commitments in the energy sector may progress slower than previously anticipated. However, the longer the country remains dependent on fossil fuels, the more difficult it will be for

its leaders to meet the net-zero ambitions. Evidence suggests that Indonesia's energy transition should be well under way.

The revised NEP, expected to be released this year, will reduce the renewable energy target from 23% by 2025 to between 17-19% in the energy mix. As a result, Indonesia's climate commitments in the energy sector may ???
