

Can Indonesia achieve energy security in ASEAN?

Pahala Mansury spoke about Indonesia's clean energy transition and shared his views on what it could take to achieve energy security in ASEAN. Indonesia is working toward transitioning to sustainable development practices that will benefit not only its citizens, but the region and the world.

Does Indonesia have energy security?

The previous study conducted by Erahman et al. has also reported an assessment of Indonesia's energy security using various dimensions, however, the assessment ranges in a narrow period from 2008 to 2013.

What is Indonesia's Energy Security Index?

The energy security index provides information that can summarize all of the energy situations. The aim of this paper is to conduct an assessment of Indonesia's energy security index within the period of 2000-2018. The energy security index consists of dimensions, namely availability, affordability, accessibility, and acceptability.

Is a net-zero power sector possible in Indonesia?

These resources mean that a net-zero power sector in Indonesia is theoretically possible, with more than 1.1 terawatts (TW) of total renewable energy potential. This presents a huge opportunity for Indonesia (Exhibit 3). The Indonesian government has laid out targets for renewable energy.

What's new at Indonesia Energy Corporation (IEC)?

JAKARTA, INDONESIA AND DANVILLE, CA, Jan. 17, 2024 (GLOBE NEWSWIRE) -- Indonesia Energy Corporation (NYSE American: INDO) ("IEC"), an oil and gas exploration and production company focused on Indonesia, today announced that it has made changes and enhanced the effectiveness of its management team and Board of Directors.

What is Indonesia's Energy Strategy?

Indonesia is projected to be among the top-five largest economies by 2045, with the population reaching approximately 324 million people. With that in mind, a particular focus of our strategy will be accelerating the energy transition to ensure energy security and, at the same time, meeting our emissions reduction target.

We are an independent energy company engaged in the oil and gas business with operations primarily in Indonesia. Our strategy is to build an oil and gas assets portfolio with an optimum mix between medium-sized producing blocks ???

We are an independent energy company engaged in the oil and gas business with operations primarily in Indonesia. Our strategy is to build an oil and gas assets portfolio with an optimum mix between medium-sized producing blocks and exploration blocks with ???
