

Your energy needs: You might also opt for a larger or smaller solar system based on the amount of electricity you want to generate. Since solar panels generate electricity during the day, optimising your solar system size to meet your daytime energy needs would be another way to maximise your solar cost savings. We recommend getting an estimate of your ???

The heart of the solar system. The electrical energy generated by the solar modules is direct current. This is very difficult to use in the home because European power grids are designed for alternating current. That's why the solar inverters from KOSTAL convert the direct current from the solar cells into grid-compatible alternating current.
