Good design, close attention to detail and the careful selection of materials and construction methods enable us to create buildings that minimize repair, maintenance and running costs. Solar water heating, solar power panels, rainwater harvesting and grey water re-use ensure our buildings have a minimal impact on their surroundings.

Solife Inc. is a privately held EPC company located in St. Vincent and the Grenadines. We have been in operation since 2011 and have completed 3.8 MW of solar system installations on the island, and have consulted/assessed over 40 MW of Solar systems regionally.

The Mayreau Microgrid Solar Project is in its final stage, which is the testing and commissioning of the solar photovoltaic (PV) and Battery Storage system. St. Vincent Electricity Services Limited (VINLEC) and the Rocky Mountain Institute - Carbon War Room (RMI-CWR) partnered on this initiative which introduced renewable energy for electricity
