A solar inverter is really a converter, though the rules of physics say otherwise. A solar power inverter converts or inverts the direct current (DC) energy produced by a solar panel into Alternate Current (AC.) Most homes use AC rather than DC energy. DC energy is not safe to use in homes. If you run Direct Current (DC) directly to the house

AEMIT is a private sector innovative developer in the field of PV solar energy infrastructure design, import, and installation. It was founded in 2018, as a subsidiary of the Arab African Company for Investment and Development (AACID). AEMIT is one of the largest and most innovative solar solution provider in Sudan.

Sudan's economic growth has been driven mainly by the agricultural sector, and government have attached great importance to agricultural investment. Inverters are a crucial part of any solar energy system. Their purpose is to convert the DC electricity that the solar panels produce into 240V AC electricity, which is what powers everything in your home. The inverter is a hardworking piece of equipment that works constantly throughout the lifetime of your system.

Solar power inverters have a crucial role to play in a solar system as they convert the electricity of solar panels to make them usable for running various appliances, lighting, and other electronics at homes or businesses.

However, rooftop solar PV has not yet been widely adopted in many sub-Saharan African countries, such as Sudan, although they are endowed with high solar radiation and in dire need of additional
