

In December of 2016 we deployed a pilot project at a hospital in the North of Syria. Over 8 weeks, our team installed 480 solar panels. we determined that solar panels combined with an energy storage system and a diesel generator is the most effective solution for hospital energy management. This system can: Have continuously available

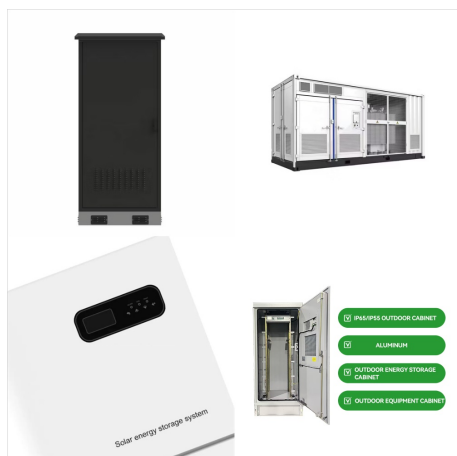

Solar power for Syria. Syria's power grid has been decimated by years of war, leaving millions with unreliable energy. "It's a hybrid PV system based on an energy storage system and a diesel generator that runs in parallel," says Makidssi. "The system is composed of 480 solar PV modules, each at 265W capacity, formulating a 127KW
