

Iranian President Ebrahim Raisi kickstarts a transformative initiative to construct 95 solar power plants with a total capacity of 4,000 MW, significantly advancing the country's renewable energy landscape.

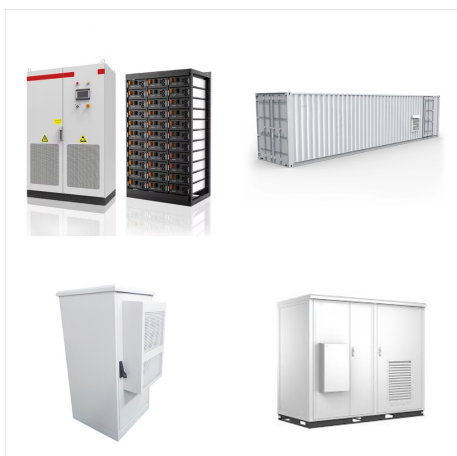

Often saving the homeowner 20%-40% on their electric bill. The best part, no liability or financing required! The PPA is a hassle free solar option creating immediate and long term savings along with significant positive impact on the environment!

Enlite Home is a relatively new solar installer that is based in Sacramento, California. It works with high-quality panel and solar equipment manufacturers such as SunPower that have a 25-year warranty and competitive prices.

Unlike traditional solar, you don't even pay for materials, installation or maintenance. Instead, you buy solar energy every month, at a fixed rate much lower than your local utility's. It's that simple, no more rate hikes or surprise bills. You receive all the electricity produced by the system.

An Enlite Solar Consultant will analyze your current energy usage and create a custom proposal to fit your exact electricity needs while lowering your monthly payment and helping you go green. Select the best option for your home while we work on final designs, inspections, and permitting.

Enlite does seem like a solid option for solar, but it's always a good idea to do your due diligence. Make sure to read the fine print in their contracts and compare their offerings with other solar providers in your area.
