

Is Sunrun solar a good company?

Sunrun Solar has been helping homeowners install solar panel systems on their roofs for 16 years. The company offers a wide range of payment options and types and generally uses quality products. This makes Sunrun a solid choice for homeowners who need a quality system but can't afford to shell out all the cash at once.

Who is Sunrun solar?

If you're thinking about adding a rooftop solar system to your home, you've probably come across the name Sunrun. Started in 2007, the San Francisco-based company has grown into the largest solar company in the U.S., with roughly 16% of the residential market.

Does Sunrun have good customer reviews?

Although Sunrun gets generally positive customer reviews, negative reviews mention trouble transferring accounts to new homeowners after moving, customer service issues, and deceptive marketing regarding efficiency expectations.

Should you buy solar panels from Sunrun?

Sunrun is worth considering for those planning to lease solar panels or purchase additional products to maximize the electricity their panels produce. If you want to own your solar panels, the company offers a standard warranty and options to set up a loan or pay upfront.

What brand of solar panels does Sunrun use?

The company doesn't go into specifics about the brand of panels used in its system, but you can ask about that during the consultation. The company provides a unique battery product, the Sunrun Shift, for California and Hawaii homeowners to use solar electricity later in the day, during peak hours.

Does Sunrun offer solar loans?

The company still offers solar loans and full purchase payment options, but there are fewer additional perks with these plans with Sunrun. This dynamic makes Sunrun less appealing if you care to get more financial gain out of a solar panel system, which loans and full purchases permit.
