

Who is ISC SRL?

ISC srl is a innovation company in the PU World with a 30-year experience. Our successes are intended to help improve people's lives. At the same time, our innovations form the basis for sustainable and profitable business activity and are the key to achieving leadership positions in our markets.

Where does energy come from in Italy?

Energy in Italy comes mostly from fossil fuels. Among the most used resources are petroleum (mostly used for the transport sector), natural gas (used for electric energy production and heating), coal and renewables. Italy has few energy resources, and most supplies are imported.

What percentage of Italy's electricity comes from solar?

According to Eurostat, approximately 11.6% of Italy's electricity now comes from solar energy, while 8.8% is generated from wind power, making Italy one of Europe's leaders in renewable energy. However, these impressive numbers represent just the beginning.

How can Italy increase its solar and wind energy capacity?

To achieve these targets, Italy has set ambitious plans to further increase its solar and wind energy capacity. By 2030, Italy aims to produce at least 30% of its total energy from renewable sources, with a significant portion of this coming from solar and wind power.

When will energy storage capacity auction start in Italy?

The energy minister of Italy has signed a decree paving the way for an energy storage capacity auction to kick off in the first half of 2025.

How many renewable power plants will Italy have in 2023?

Based on its existing energy policy, Italy expects 7 GW of renewable power plants (predominantly wind and solar) to come online by the end of March 2023 and about 8 GW per year after that.

The main goal is market research, development and realization of the newest technologies available in the world, applied to the final equipment produced with top quality solutions, placing ISC s.r.l. As a primary choice for quality, price and service.
