

Italy's influential agribusiness lobby Coldiretti has hailed the ban and says the government must invest in irrigation rather than allow private developers to use marginal drylands for solar

Italy's rightwing government on Monday banned the installation of ground-based solar panels on agricultural land, just days after Rome committed to triple installed renewable energy capacity by

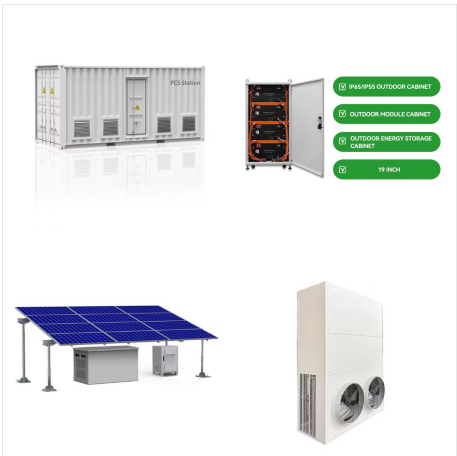

By installing solar panels above crops, it can maximise land productivity, generate renewable energy, and enhance crop yields by creating microclimates. Italy, with its pleasant climate and agricultural landscape, is growing as a leader in this sustainable initiative.

Italy's rightwing coalition on Monday passed rules curbing the installation of solar panels on agricultural land, ministers said, in a move that triggered criticism as it could undermine Rome's decarbonisation goals.
