Solar power technologies harness the energy from the sun's light and converts it into electricity. Solar photovoltaic panels, (Solar PV panels), are made up of individual cells made of silicon or other special material. When the sun hits the solar panel the photons from the sunlight are absorbed by the cells, creating an electric field and causing electricity to flow.

Schedule an appointment with the New Jersey solar panel installers at Green Power Energy today and experience the benefits of going solar. Update - We lost power for 46 hours on 1/9/24 to 1/11/24 due to a winter storm. The battery/solar backup powered our house the entire time and worked perfectly. Daniel Landgren . 2024-01-08.

Can a Solar Panel Be Used Without a Battery? Yes, a solar panel can be used without a battery, as said. When you connect a solar panel directly to an electrical load or a device, it generates electricity in real-time. This setup is often referred to as a "direct grid-tied" or "battery-less" system.
