The Jetboil Sol Ti Premium Cooking System (hereafter referred to as the "Jetboil" or the "Sol") is an all-in-one cooking system made with the solo hiker in mind (hence, the name Jetboil "Sol"). ???

JETBOIL SOL ADVANCED COOKING SYSTEM

The cooking system has a clever design which secures the igniter, making it one of the safest outdoor cooking solutions available. Cooking Capacity. While the Jetboil Sol holds a maximum of 0.8 liters, the Jetboil Flash holds up to a liter. So when it comes to capacity, the Flash wins. Here are a few point on why the Sol, though not as

Jetboil SOL-AL Advanced Cooking System w/ThermoRegulate Designed to fuel your backcountry passion, Jetboil Sol delivers ultimate performance and reliability in extreme conditions.Trust Jetboil Sol to

:eek: That's right folks, the Jetboil Sol aluminum (10.5oz) & ti (8.5oz) stove systems are being discontinued :confused:. Up to now I have been using a homemade alcohol stove and I've been looking hard at the Jetboil Sols and when I went to the Jetboil web site I didn't see the Sols listed as a "cooking system". I thought this can't be so I called Jetboil (contact us: (888) ???

JETBOIL SOL ADVANCED COOKING SYSTEM

The Sumo TI Group Cooking System redefines backcountry group cooking performance, with a 1.8 litre titanium FluxRing cooking vessel weighing in at 185g, and complete system weight of 345g. Features "Thermo-Regulate" technology - consistent heat to 260°C; 1.8 litre "FluxRing" cooking cup; Insulating jacket and secure strap

Jetboil's Personal Cooking System (PCS) is fast, fuel-efficient, and foolproof, and this new titanium version is barely half the weight. With a burner and a .8-liter, neoprene-insulated cooking cup (includes sipper lid) with a fused-on heat exchanger, it cranks out a boil in just over two minutes (average time for full .8-liter pot in a variety of conditions) and keeps its firepower ???

I've been a big proponent of the Jetboil butane canister hiking stove system since it's inception. It's fuel stingy yet drag racing quick heating is still dazzling after many years of trouble free use., and I've used in on multiple trips from the 8,000 ft. + snow covered Marble Mountains to the drenched in fog Lost Coast from the 8,000 ft. snow draped The original ???

JETBOIL SOL ADVANCED COOKING SYSTEM

In my opinion, the Soto + Jetboil Stash pot set is more interesting than the Jetboil Sol Ti. I have the second generation, the one that came out in 2014 (the first version was in 2011 or 2012). - Weight. Jetboil Sol Ti: pot 105g, neoprene sheath (handle) 27g, stove + base 103g, cover 20g, radiator guard (which is important here) 29g = 284g.

Jetboil MightyMo Cooking System]The Jetboil MightyMo is a powerful but standalone isobutane canister stove with a 10,000 BTU output. This is useful if you want to boil a big pot of water fast for hungry scouts. The MightyMo can be used with third-party cook pots and skillets from other manufacturers although it is optimized for use with the giant Jetboil 5L ???

In this true 4-season upright canister cooking system, Jetboil introduces advanced Jetboil Thermo-Regulate Burner Technology to deliver consistent heat output down to 20 F (-6 C). The all-in-one Sol Ti design offers all of the features and functionality of Jetboil's trademark convenient cooking systems, including integrated burner base and 0.8

Ready to test boil times of the Jetboil Sol Advanced (left) and MSR Reactor (right) Sure enough, the Reactor is faster, hands down. The Reactor boiled 16oz (0.5 liter) of tap water to a full, rolling boil in just 87 seconds while the Jetboil Sol took 129 seconds to achieve the same rolling boil. The Reactor's system is amazingly efficient.
