

Here's how you can see Saturday's "ring of fire" solar eclipse. This Saturday, many people around the world, including St. Vincent, will experience a rare celestial event: a solar eclipse. Solar eclipses don't happen every day, so seeing one will be a rare pleasure. A solar eclipse occurs when the moon passes between Earth and the sun

Saint Vincent and Grenadines receives high levels of solar irradiation (GHI) of 5.2 kWh/m<sup>2</sup>/day and specific yield 4.3 kWh/kWp/day indicating strong technical feasibility for solar in the country.<sup>3</sup> In 2021, 26.67% of the country's power demand was met through renewable sources.<sup>4</sup>

Saint Vincent and the Grenadines: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass ??? the burning of

The Grenadines was also affected, as the lack of rainfall and very warm temperatures had all but dried up the limited supplies stored on the islands. On many occasions, water had to be taken by ferry, trucked, and then distributed on the islands. This further added strain to the already limited supply on the island of St. Vincent.
