

Where can I find information about energy in Eritrea?

You can find information on energy production, total primary energy supply, electricity consumption, and CO₂ emissions for Eritrea on the IEA homepage. For data on energy access (access to electricity, access to clean cooking, renewable energy, and energy efficiency) in Eritrea, visit the Tracking SDG7 homepage.

Is the Eritrean government facilitating oil & gas exploration?

The Eritrean government is facilitating oil and gas exploration, examining the potential of geothermal energy generation, and open to utilizing excellent wind energy resources as a driver to export-oriented industrial growth, but these scenarios are fairly speculative at this stage, and thus beyond the scope of the present study.

What is Eritrea's energy policy?

The main sector policy is the Energy Policy 2009 (Table 5). Most of Eritrea's energy is generated from thermal yet the country has plenty of renewable energy potential. The Energy Policy aims to increase the use of renewables in its energy mix so as to reduce dependency on fossil fuels and lower greenhouse gas emissions.

Can agricultural waste generate electricity in Eritrea?

Agricultural waste could generate electricity thermally; Energy crops, such as Salicornia (being developed by SeaWater Farms, a biofuels company), could generate electricity for local uses or for the central grid (REEEP, 2012). Ninety per cent of Eritrea receives only 450 mm of rain a year and evapotranspiration rates are very high.

How much does electricity cost in Eritrea?

The current electrification rate (fraction of people with access to electricity) in Eritrea is about 20%, and as complete electrification is attained, we can expect national expenditures approaching 50 to 100 USD per household per year for electricity supply.

Is Eritrea making EE/re investments?

The actual investment intensity estimate shows that Eritrea is currently making EE/RE investments at the level of the moderate EE/RE scenario and the investment intensity may accelerate in the next few years.

I came to JLA in 2008 on a temporary contract while I deliberated about whether to go back to university. JLA is a great place to work with so many progression opportunities, especially if you're willing to put in the effort, be forward-thinking and work hard.

The JLA Active Cool 1300 fridge combines cooling power and energy efficiency into a double-door commercial refrigerator. Ideal for busy kitchens that need durability and reliability as well as increased stock storage, the Active Cool 1300 uses high-efficiency fans to improve air circulation and keep stock cool, even in ambient temperatures of up to 32°C.

JLA's Energy Smart Hub is a great place to start understanding what you can do to start decarbonising your business today. Explore now for useful links, advice on regulation, and energy-saving tips and tricks. Or if you'd like to chat with ???
