 Manufacturer's name KACO new energy GmbH and  
 address Carl-Zeiss-Strasse 1 74172 Neckarsulm,  
 Germany Product description Photovoltaic feed-in  
 inverter Powador 48.0 TL3 - M - INT - Park Powador  
 72.0 TL3 - M - INT - Park Type designation  
 Powador 48.0 TL3 - XL - INT - Park

KACO New Energy GmbH Solar Inverter Series  
 Powador 48.0-72.0 TL3 Park. Detailed profile  
 including pictures, certification details and  
 manufacturer PDF KACO Inverters have a lot of  
 important advantages: (1) They are configurable with  
 many different types of panels and voltages. This is  
 because the input voltage capacity is up to 800V DC  
 (Type

Three-Phase Inverter The Powador 39.0 TL3 and  
 60.0 TL3 are transformerless, 3-phase solar PV  
 inverters with AC powers of 33.3 kVA and 49.9 kVA.  
 They combine the utmost efficiency with ultimate  
 uptime for decentralized commercial and  
 utility-scale solar power plants.

# KACO POWADOR 48 0 TL3 SOLAR INVERTER

The transformerless, three-phase inverters Powador 48.0 TL3 Park and 72.0 TL3 Park. The Powador 48.0 TL3 Park and 72.0 TL3 Park are transformerless three-phase inverters that, with their output voltage of 480V, are particularly suitable for connection to external transformers of large decentralised systems.

Carl-Zeiss-Str. 1 | 74172 Neckarsulm | Germany  
Powador 39.0 TL3 72.0 TL3 Transformerless,  
three-phase string inverters. Efficient. Flexible.  
Proven. 3 MPP trackers and wide MPP range for  
flexibility in system planning and dealing with  
shadowing Versions with overvoltage

Kaco Powador 72.0 TL3 Park The Park has the  
power. The Powador 72.0 TL3 Park is  
transformerless, 3-phase units with AC powers 60.0  
kVA. As efficient and flexible as the Powador 30.0  
TL3 to 60.0 TL3, these solar PV inverters are ideally  
suited for connection to the external transformers of  
decentralised commercial and utility-scale solar  
power

The Powador 48.0 TL3 Park and 72.0 TL3 Park are three-phase inverters suitable for large decentralized solar systems. They have 3 maximum power point trackers each capable of handling 20-24 kW of solar panels. This allows for flexible system designs with uneven panel installations. The inverters have high efficiencies up to 98.3% and integrated data logging and ???

# KACO POWADOR 48 0 TL3 SOLAR INVERTER

KACO Powador 48.0 TL3 Park. The Park has the power. Functions Our Powador TL3 Park units are transformerless inverters with an output voltage of 480 V. This caters for a frequent need in designing large-scale solar power plants that require connection to external transformers. The peak efficiency of this solar PV inverter is 98%.

the three MPP trackers of the Powador 72.0 TL3 Park XL can even be connected to 400V strings. The rated input voltage range is from 410 to 800 V (Powador 48.0 TL3 Park) or 580 to 850 V (Powador 72.0 TL3 Park). The inverters switch to the grid from 250V, and, when in operation, they still feed in at 200 V. The peak efficiency is 98 %.

The transformerless three-phase inverters Powador 48.0 TL3 Park and 72.0 TL3 Park. The Powador 48.0 TL3 Park and 72.0 TL3 Park are transformerless three-phase in-verters that with their output voltage of 480V are particularly suitable for connection to external transformers of large decentralised systems.

# KACO POWADOR 48 0 TL3 SOLAR INVERTER

The Powador 48.0 TL3 Park and 72.0 TL3 Park are transformerless three-phase inverters that, with their output voltage of 480 V, are particularly suitable for connection to external transformers of large decentralised systems. These units give you flexibility in designing your PV system. They operate using three separate MPP trackers that can handle both symmetrical and ???
