

Make those intermittent power outages a thing of the past! Hybrid Inverters have become a staple in homes and businesses due to intermittent black-outs. They keep the power on and your business running. How? By converting DC power generated from the PV array into usable AC power and work with batteries to store excess power as well.

The best solar batteries for sale in Kenya come with high battery life and offer many charge/discharge cycles. A good battery should also come with a warranty that guarantees a certain number of life cycles or years of useful life. During this period, the battery should not drop the capacity to a given warrantied percentage value.
