

Who is Libra energy?

Libra Energy is an importer, distributor and full-service wholesaler for products that generate sustainable energy and charging systems for electric vehicles. We offer you and all our customers a very diverse range of products for a sustainable future. All our products come with comprehensive service and support.

What if there is a problem with Libra energy?

If there is a defect, you can count on professional assistance so that your problem is solved quickly. With a clear overview of the stock and short delivery times Libra Energy also offers your company the guarantee of trouble-free delivery. Order 24 hours a day, seven days a week.

Will Libra energy deliver to my address in the Netherlands?

Once ordered, a lot of products can be delivered directly to you. We work with our logistics partners to ensure it is possible to deliver to any address in the Netherlands the next working day. As a Libra Energy customer you can expect the best product quality.

What is a Libra energy battery?

Libra Energy sells LG Chem's lithium home battery. This is ideal for increasing self-consumption in an existing PV system. The LG Chem RESU batteries are especially developed for energy storage systems in residential projects. They are simple to install on walls (hanging) or floors (standing), both indoors and outdoors.

How do I order from Libra energy?

And we've been doing this since 2007! With Libra Energy you can order easily by telephone or via the webshop. During office hours, you can reach us by phone while the webshop is open 24/7. Our webshop shows the current stock, up to two months in advance, so you know straight away if your order can be delivered on time for the job.

Libra Energy is a leading Australian developer of renewable energy power projects and a member of the Libra Group, which is based in Brisbane, Australia for 33 years. Electricity is power! It empowers better education, health, clean ???
