Knobelsdorff partnered with customers in the early days of renewable energy development, and our capabilities have grown rapidly to meet the challenges of this booming marketplace. Solar, biomass, battery storage and electric vehicle a?|

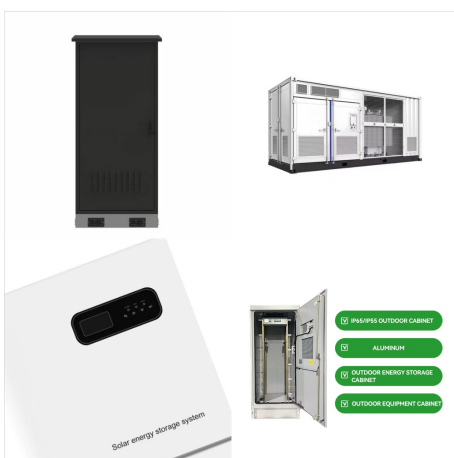

From grain elevators and fertilizer plants to feed and flour mills, Knobelsdorff has designed and implemented specialized electrical and controls systems for some of the best-known names in agribusiness. With the experience and expertise we bring to these projects, our customers also rely on us for all scopes of project work including ongoing

Knobelsdorff can handle renewable energy projects from beginning to end or provide specific services. Most contractors provide only engineering and procurement and then subcontract the construction. We do all three in-house, a?

The Situation. Rochester Public Utilities (RPU) has a goal of utilizing 100% renewable energy by 2030. This 10 MW solar farm constructed on 140 to 160 acres provides 1.5% of the city's needs and gets the community one step a?

From our very first day in business more than 30 years ago, Knobelsdorff has partnered with food processing and beverage production companies. Dozens of customers rely on us for new facilities, process lines, automation & controls, general maintenance and emergency services. Safety and productivity are always top-of-mind, and our deep

Knobelsdorff started over 35 years ago in a small garage, founded on a simple but powerful commitment: to deliver reliable, high-quality electrical services to our local community. What began as a small operation has grown into a multifaceted company with four divisions, projects across the nation, and a presence that reaches even beyond our national borders.

The professionalism and business relationship are very comforting in an industry which starts and stops for reasons outside of anyone's control. When visiting a Knobelsdorff site, you can see the care taken from the torque marks to stainless clips used for wiring management. Knobelsdorff truly designs and builds a product meant to last 30 years.

At Knobelsdorff, we specialize in building 1-20 MW solar sites, and we're always on the lookout for talented individuals to join our team. Whether you're interested in starting as a solar installer or aiming for a leadership role as a construction manager or estimator, the solar industry offers a vast array of career paths and opportunities for growth.

In 2019, Knobelsdorff served as EPC contractor and completed four solar projects for Nautilus, totaling 21 MW DC in Minnesota. These renewable energy projects were located in Helen, Warsaw, Northfield, and Walcott, and they were all new construction. We used bifacial modules and single-axis trackers (one fixed tilt) at all sites, with a fixed
