

Who is Thermax Babcock & Wilcox?

Thermax Babcock & Wilcox Energy Solutions Private Limited manufactures electrical power equipment. The Company offers subcritical and supercritical boilers, low NOx combustion systems, and roll wheel pulverizers.

What is Thermax & Babcock & Wilcox joint venture?

The joint venture looks to set up a manufacturing facility with an annual capacity of 3,000 MW. Thermax will hold 51 per cent of the equity, which will come from its cash reserves, while Babcock and Wilcox Power Generation Group will hold 49 per cent. The debt-to-equity ratio will be 1:1.

Why did Babcock & Wilcox buy B&W thermal?

Babcock & Wilcox announced today that its B&W Thermal segment has received an order for approximately \$7 million to provide equipment and services for a utility customer in Southeast Asia.

Who is Babcock & Wilcox?

About Babcock & Wilcox Headquartered in Akron, Ohio, Babcock & Wilcox Enterprises, Inc. is a global leader in energy and environmental technologies and services for the power and industrial markets. Follow us on LinkedIn and learn more at

Will Babcock & Wilcox make super-critical boilers?

Energy and environment solution provider Thermax and US-based Babcock & Wilcox (B&W) have inked a joint venture agreement to manufacture super-critical boilers for the power sector, with an investment of Rs 700 crore. The joint venture looks to set up a manufacturing facility with an annual capacity of 3,000 MW.

What happened to Thermax & B&W?

In February 2008, Thermax had signed a technology transfer deal with B&W for manufacturing sub-critical power boilers, from 100 MW to 800 MW. Mr Unnikrishnan said that up to 300 MW (sub-critical) units would be taken care of by Thermax's existing facilities and the rest would be transferred to the joint venture company.

Thermax executed a 100% biomass fired cogeneration plant, deploying a 33 TPH hybrid water tube superheated bi-drum boiler with a reciprocating grate, designed at 67 kg/cm2 pressure and 450°C temperature, for the client. The boiler has been designed to run on a mix of biomass briquettes and loose biomass fuels to generate 4 MW power as well as
