

Will Lithuania build a 100 MW solar plant in Riga?

Lithuania's SNG Solar is set to build a 100 MW solar plant in the port of Riga, Latvia. Upon completion, the facility will be one of the largest solar projects in the Baltics. Lithuanian solar developer SNG Solar has signed an agreement with the Freeport of Riga Authority to construct a 100 MW solar plant in the port of Riga.

Where is a 100 MW solar facility being built in Riga?

The 100 MW solar facility will be constructed on a 177.2-hectare site in Spilve Meadows, on the left bank of the Daugava River in Riga. This project is part of the Freeport's plan to transform the area into a hub for solar electricity production, energy storage, hydrogen, and alternative fuel production, as well as an industrial and logistics park.

Will Latvia install a 400 MW solar power plant in 2023?

In May 2023, Latvian developer PurpleGreen Energy B announced plans for a 400 MW solar power plant near the Russian border. According to the International Renewable Energy Agency, Latvia had installed 353 MW of solar capacity by the end of 2023. This content is protected by copyright and may not be reused.

Will SNG solar build a 100 MW solar plant in Riga?

Lithuanian solar developer SNG Solar has signed an agreement with the Freeport of Riga Authority to construct a 100 MW solar plant in the port of Riga. SNG Solar will build the 100 MW solar plant within five years, as outlined in the agreement.

How will the Freeport of Riga benefit from green energy?

The Freeport of Riga will receive 2.5% of the green energy generated, which will support port infrastructure and operations. The plant is expected to produce about 100,000 MWh of green electricity per year. The 100 MW solar facility will be constructed on a 177.2-hectare site in Spilve Meadows, on the left bank of the Daugava River in Riga.

How will SNG solar benefit the Freeport of Riga?

Earlier this year, SNG Solar secured the land lease rights through an auction. The Freeport of Riga will receive 2.5% of the green energy generated, which will support port infrastructure and operations. The plant is expected to produce about 100,000 MWh of green electricity per year.
