

The lease agreement you sign for your land is between you and the developer. If the developer sells the project to another company to own and operate the farm, the lease agreement will transfer. Be sure to ask a developer interested in leasing your land what their plan is for the long-term ownership of the farm.

Solar developers in New York State want to lease properties on which to build 5 MWac "community solar" farms. Would your land work for a 5 MW solar farm in New York State? Here's the checklist of minimum criteria.

We Source Land for Solar Developers. SolarLandLease sources qualified landowners across the United States who are interested in leasing their land to renewable energy developers for utility-scale solar, ground-mount distributed generation solar, ???

# LEASE MY LAND TO SOLAR COMPANY

The most commonly-asked question by landowners regarding solar farms is, How much can I lease my land for? The short answer is, "it depends," but solar lease rates (also called "rents") typically range from \$250 to \$2,000 per acre, per year. This article looks at the factors that influence the rates a solar developer may offer for your

An increasing number of solar developers are now also developing storage projects, and several "pure-play" storage developers have launched. For a landowner, this offers an exciting new way to make money from your land.
