Commissioned in October 2020, the LES
Community Microgrid normally functions as a part of
the bulk electric system. Should the need arise,
however (e.g., a large or persistent outage occurs in
the Lincoln area), the microgrid has the ability to
power a portion of the downtown Lincoln area as an
island, isolated from the greater electrical grid.

LES customers may wish to interconnect a customer-owned generator in parallel with the electric system. FERC-defined qualifying facilities, which include cogeneration facilities and renewable energy generators such as wind and solar, have specific ???
