Starting a home solar panel project is a big step towards green living. It shows the many benefits of solar panels. You can save on electric bills and help reduce your carbon footprint. Both are great reasons to consider going solar. Planning your solar panel setup is key. Homeowners in India can make their homes cost-effective and self-sufficient.

From here, you'll need to know the wattage of the solar panels being used. Most residential solar panels will range from 250-400 watts, with higher wattages being more efficient but also typically more expensive. In general, for a home that uses around 1,000 kilowatt-hours per month, you can expect to need anywhere from 18-28 solar panels.

More than 4600 solar modules, installed on an area of around 1.5 soccer fields, will supply the Hilti Campus with solar power in the future. Starting end of August, solar panels with a total output of around 1.7 MWp will be installed on about 9000 m2 of Hilti's Schaan location.
