

What is a dual battery system?

A dual battery system involves the use of a second battery in addition to the vehicle's starter battery. The second battery, also known as the house battery or secondary battery, is used to power auxiliary gear and accessories, such as a winch, portable fridge, camp lights, radio, or USB outlets.

What type of battery should I use in a dual battery system?

The optimal type of battery for use in a dual battery setup is a deep cycle battery. Deep cycle batteries are designed to handle repeated discharging and recharging, making them ideal for use in a dual battery system. They also have a longer lifespan than standard car batteries.

Are lithium deep-cycle batteries a good replacement for dual-battery batteries?

As technology has developed, new lithium deep-cycle batteries have been created to act as complete replacements for dual-battery setups. They're now one of the most durable and reliable power sources on the market, with vast improvements in weight, capacity, and shelf life.

Which brands offer a dual battery setup?

We offer dual battery setup products from RedArc, Invicta, Maximus, Baintech, and Projecta. This includes the following: Along with the full installation of your Dual Battery Setup.

Does a dual battery system need a second battery?

A dual battery system requires more than just a second battery though. For a typical dual battery setup, you'll want to connect your secondary battery to your starter battery, allowing you to charge both batteries from your alternator but this requires the appropriate wiring, via dual battery wiring kits.

What is a dual battery kit?
