Iata Lithium Ion / Metal Battery Hazard Warning Labels. When it comes to shipping lithium ion or metal batteries, it's crucial to adhere to the IATA regulations and ensure that the hazard warning labels are prominently displayed on the packages. These labels are designed to alert handlers and carriers to the potential risks associated with

The easiest way to explain this is that a laptop would be considered UN3481. The lithium-ion battery inside the laptop is providing power to the actual laptop (equipment). The battery inside that laptop is classified as UN3480. A battery shipped alone would be classified UN3480.

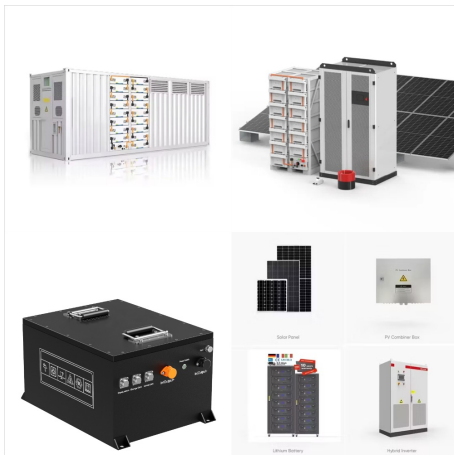

Lithium Battery Labels UN 3481: 4.72 x 4.33 inch, 200 labels total. Comply with International Regulations: Use these labels to help comply with the D.O.T, I.A.T.A., and the I.C.A.O. When Shipping Hazardous Materials. The labels can be placed on boxes, bins, pallets, product packaging, and any shipping box that ship lithium ion batteries.

??? Application of a new lithium battery handling label for certain lithium batteries. ??? Enhanced packaging and revised quantity limits for lithium batteries as shown in Table 3-1 and in the new Packing Instructions. This guidance is intended to address commonly asked questions regarding these provisions.

These labels are intended for use on packages containing "Lithium Batteries UN 3481 (Ion Batteries Contained/ Packed in Equipment)" to satisfy this need. They are paper labels with permanent pressure sensitive adhesive on the back. Labels are packaged and sold in quantities of 1000 (2 Rolls of 500).

It is a legal requirement to label packages containing lithium batteries with the appropriate UN 3481 label when they are being transported by air, sea, or road, to ensure the safe handling and transportation of the hazardous material. 3481 ???
