

What are the best batteries for a trolling motor?

Where we basically had a cranking battery and a deep cycle lead acid battery for our trolling motors, now we have a plethora of options from AGMs to Lithium and of course still lead acids. The marine batteries of today are some of the best trolling motor batteries and best marine electronics batteries we've ever had at our disposal.

Why should you buy a lithium battery for a trolling motor?

We've harnessed the power of lithium chemistry and combined it with North Dakota grit to build you a better battery. All guaranteed by a world beating, best in class, eleven (11) year warranty. Dakota Lithium batteries will give you twice the run time for your trolling motor while lasting 8x longer, providing exceptional lifetime value.

Can a deep cycle battery run a trolling motor?

A deep cycle battery will hold a charge longer and discharge power consistently until it is almost dead. This makes it perfect for running a trolling motor at the same power all day. Deep-cycle trolling motor batteries fall into three categories: flooded wet-cell, absorbent glass mat (AGM), or lithium-iron-phosphate.

How long do trolling motor batteries last?

Charge Cycles: Most trolling motor batteries are rated for at least 3,000 charge cycles, meaning a full re-charging and full (or nearly full) discharging of the battery through use. Some trolling motor batteries may well last more than 10,000 charges, though, so consider a battery's durability and longevity when weighing the cost-value balance.

What are trolling motor batteries made of?

The latest and greatest trolling motor batteries are made of lithium iron phosphate. Unlike heavy, bulky lead-acid batteries, lithium is lighter and more compact. The compound also handles power more efficiently and lasts considerably longer with a greater tolerance for recharging.

How much does a trolling motor battery cost?

It's also capable of deep cycle usage, adding a little versatility to this package. At \$249 for the Group 27
