If you put a 6V battery in a 12V ATV, it will not start. SAE is short for the Society of Automotive Engineers. It tells you that the American standard was used to estimate the battery's CCA rating. The American and European norm differs slightly. [PP]>PP< tells you the battery casing was made with a polypropylene-polyethylene copolymer.

This will save you huge as a well-maintained lithium-ion battery can outlive your ATV and the lightweight and maintenance-free conveniences make it the perfect deal maker. Conversely if you want to avoid or run short of a huge upfront cost, lead acid batteries are available at the fraction of the Lithium-ion price. Backed by years of service

Lithium-ion ATV batteries usually have a higher cold cranking amp (CCA) rating over the AGM type of battery. Terrain vehicles equipped with items such as a winch or light bar will need a battery that can hold a charge better than lead acid batteries. Powersport machines produced by Honda, Polaris, Can-Am, Kawasaki, Yamaha, and Suzuki all have
