

Bringing an Electric Toothbrush in Your Checked Luggage. Bringing your electric toothbrush in your checked baggage is fine, even if it uses a lithium ion battery.. This is because the toothbrush 's rechargeable battery is usually built into the device.. But what about if you want to travel with a spare lithium ion battery a?? i.e. a removable battery a?? for your electric toothbrush?

Lithium Polymer (Li-Po): Li-Po batteries, while less common, are sometimes used in electric toothbrushes because they are even lighter and more flexible than Li-ion batteries.They can be molded into various shapes, allowing toothbrush manufacturers to create slimmer and more ergonomic designs.

Most electric toothbrushes run on a lithium-ion battery and therefore should be in your carry-on bag. Any spare lithium-ion batteries for your electric toothbrush should also be in your carry-on bag. You might be concerned that your electric toothbrush has a sharp point without the brush attached, but it is still fine for carry-on bags.
