UltraSafe - Safe and easy-to-use car jumper starter and jump pack without worrying about incorrect connections or

LITHIUM ION CAR BATTERY JUMP STARTER

A jump starter not only helps make sure your car can survive a low or dead battery, it also lets you help other stranded travelers you may meet along the road. The first component to fail in a jump starter is usually the lithium-ion battery. To protect the battery's life, keep it charged and store it in moderate temperatures whenever

Depends on what type of "lithium" battery is inside the jump-starter. Lithium-ion/Lipo batteries start to go into thermal runaway at about 60°C (140°F). LiFePO4 is safe up to much higher temperatures because it doesn't "cook off" until over 220°C (at which point the interior of your car would already be melting!).

It also features a high-performance four-cell lithium battery that delivers enough power to jump start up to 10.0L gas and 8.0L diesel vehicles. Advanced Pre-Boost technology ensures safe charging of deeply discharged batteries, while the Pre-Heating feature warms batteries in cold conditions, making it possible to start a vehicle even in
