

Why are lithium batteries not good for starting?

Charging them in sub-freezing temperatures can cause lithium plating, a process that will cause a loss of battery capacity and also cause short circuits, causing permanent damage to the battery. Why Aren't Lithium Batteries Good for Starting? The issue isn't necessarily with the power output of the batteries.

How long does a lithium battery last?

11 YEAR USA WARRANTY: Dakota Lithium's batteries were born in the rugged landscape of North Dakota and are backed by a "Best in Class" 11 Year Warranty. BUILT TO LAST: Our LiFePO₄ Batteries deliver 2,000+ cycles in recommended conditions. A typical Lead Acid battery only has 500 cycles.

What is a lithium ion battery pack?

These lithium-ion battery packs feature superior pack construction, electronics, and performance, providing users more work per charge and more work over pack life than any battery on the market. Each battery pack is durably built for heavy-duty use, runs cooler, and performs in climates below 0°F/minus 18°C.

What makes Dakota lithium batteries different?

Built Smarter: All Dakota Lithium Batteries include Battery Management System (BMS) technology that controls cell balancing, low and high voltage cutoff, and short circuiting. Dakota Lithium batteries stand out for their remarkable lightweight construction, thanks to advanced lithium iron phosphate technology.

Is x2power LiFePO₄ a good starting battery?

The answer to this question largely depends on the application. If you are looking to use a lithium battery as a cranking battery in your car, truck, RV or boat then the answer is a resounding no. If you are looking for a battery for your motorcycle, jet ski or ATV, then yes, an X2Power LiFePO₄ battery is a suitable choice for a starting battery.
