Lyght Power Systems Transfer Switches 50 amp Transfer Switch quantity. Add to cart. SKU: LPT50MRD Category: Electrical Relays/Transfer Switches. Description Additional information Description. The LPT50MRD Automatic Transfer Switch is designed to provide automotive selection between two sources of power, such as a shore cord and a generator

I just received a transfer switch that I purchased through a marine supply distributor. I thought I was purchasing a ESCO LP50BRD, but received one with the front decal indicating it was a LYGHT Power Systems Transfer switch. Inside the front cover, it says "manufactured b Elkhart Supply Corporation". See the two attached photos.

These parts for the ES30 Transfer Switch are available for purchase: SPC6x6x3 Enclosure, 20241-83 30A DPDT relay 120V coil, 604704AL-12 time Delay Relay, QB22 ground bar, ES30AH-1 Harness Control Wires, ES02 Red Jumper Control Wires, 10WH-6 White Neutral Wire, ES30-Cover Cover Label, ES30-INST Instruction Label

I. NO SHORE POWER The design of the LPT30 allows shore power to be run through the normally closed contacts of the relay. This means whenever the shore cord is plugged in, power goes through the relay to the load panel. The relay does not have to be energized. If you are having problems with incoming power from the shore

My 50A power cord uses #6 wire to the RV receptacle. #6 wire from receptacle to transfer switch and #6 wire from transfer switch to circuit breaker panel. My last transfer switch failed when the #10 internal wires over heated and melted into the ground wires creating a fire hazard (and I am not the only one who has had this problem).
