In Macau's Dawan District, CEM is currently involved in constructing renewable energy sources such as offshore wind power and solar photovoltaic power generation. It's also involved in building hydropower renewable energy, such as pumped storage and natural gas combined-cycle power generation projects.

The share of renewables (wind, solar, hydro, biomass, ocean, and geothermal) in world electricity generation is close to 26%, while wind and solar PV costs continue to decline rapidly, improving their cost competitiveness versus new coal and natural gas plants. The world's total renewable-based power capacity currently in excess of 2,500 GW

The integration will empower solar installers to deliver projects faster, with lower costs, to enable more solar installations. "Lyra's advanced automation software for plan sets is the solution the solar industry needs to alleviate a key homeowner pain point ??? the often agonizing local permitting process ??? and cut down on wasted time
SOLAR®

At our heart, we''re environmental activists on a mission to help preserve the environment by making residential solar power ubiquitous. We believe this will lead to a sustainable new energy economy. Weaving Lyra's vision and mission into the solar ecosystem for a healthy environmental, social, and governance impact. Shawn Kranitz.

Why Lyra Our solar design tool and permit package generator is built for both national contractors and local installers in the US and Puerto Rico. Create permit-ready PV system designs in minutes - not days; Generate Permit Packages yourself with a single click - seriously;

Lyra Solar has a vision for a more open ecosystem of solar software solutions where different platforms can work with one another to build a higher value constellation of solutions for the industry. Lyra's core design and permit package application can be embedded in other solar software SaaS products and offers integration solutions for
