

Mackenzie Navy Solar System Glow-in-the-Dark Adaptive Backpacks. \$82 - \$97. Overview. Durable, ultra-functional and loaded with personality, our Mackenzie adaptive backpack is perfectly designed for school, field trips and fun outings.

Lunch Boxes glow in the dark. Glow-in-the-dark treatment needs to charge in direct sunlight or artificial light for approximately half an hour to glow for three to four hours. The glow treatment can fade if subjected to excessive wear and tear.

Exterior side pockets are designed to hold any of our water bottles (sold separately). Our glow-in-the-dark backpacks features a material that needs to "charge" under bright light for approximately half an hour to glow properly. Mini backpacks are made of 30 units of 500ml recycled plastic bottles, exclusive of trims.
