

What are some solar energy developments in Malawi?

In Malawi, solar energy developments are helping local communities maintain sustainable energy. For instance, Bwengu Projects Malawi provides teachers in high-needs schools with solar-powered LED projectors in Bwengu, the northern countryside of Malawi.

Is Malawi a good place to invest in solar energy?

"Salima Solar is the first solar PV plant in Malawi to be connected to the national grid. As such, it is a model for future projects in several ways... In particular, it demonstrates that Malawi is an attractive destination for private sector investment in energy," says President Lazarus McCarthy Chakwera at the plant's inauguration ceremony.

Where is Malawi's first solar power plant located?

The centrally located facility is Malawi's first solar power plant connected to the national grid, a project successfully completed under a public-private partnership (PPP). The President of the Republic of Malawi Lazarus McCarthy Chakwera visited the Salima district, 101 km from the capital Lilongwe, on November 16, 2021.

What role does USAID play in Malawi?

USAID is collaborating with solar power companies to provide solar home systems for homes in Malawi. In 2018, the International Monetary Fund (IMF) reported that 53 percent of Malawi's population was under the age of 18.

How many GWh will the Salima solar power plant produce?

The Salima solar plant will be capable of producing 154 GWh per year. The Salima solar power plant is the result of a public-private partnership (PPP) project originally developed by JCM Power Corporation, Matswani, and InfraCo Africa, a Private Infrastructure Development Group (PIDG) company.

What is the Salima solar project?

The project also engaged a professional chef from Lilongwe to train a team of local women to prepare and serve free, nutritious meals for the construction team each day from the on-site African Food Kitchen facility. The Salima Solar project ties in with Power Africa initiatives in the region which aim to connect more people to the national grid.
