The Smart Power SPS-1000 Battery Backup Power Supply with 2 x gel batteries and a solar charge controller, easily connects to a standard wall socket and is designed to instantly supply your home or workplace with electricity when your power goes off.\*Stock arrives on 4th of November 2019 - Pre-order now to avoid missing out!

I"ve got my SPS-600 connected to 4 x 100w panels (parallel config), getting a good 20-24amp charge on sunny days. Then it's connected to 2 x 13V 100ah Hubble batteries also connected in parallel. So it remains a 12v system altogether. I"m interested how everyone are handling their charging schedules with the SPS units connected to solar panels?

??? The system will charge the battery automatically and power your appliances using solar or mains electricity. When fully charged, the battery capacity display shows four bars and maintains a float charge. (NB. the use of solar panels is optional.) ??? If a power cut happens the SPS will immediately switch to battery power.

The SPS 1000 is a 24V machine and needs TWO 12V battery wired in series. The battery compartment is sized for TWO standard 100Ah batteries ??? back to back. It is compatible with most deep cycle batteries, e.g. Lead acid, GEL, AGM.

The new SPS-1000 precision positioner is an ideal system of choice for military applications and offers the industry's best combination of reliability, precision, and affordability. The new SPS-1000 maximizes the use of Military COTS ???

The Smart Power System (SPS) doesn't require an electrician and simply plugs into a standard wall socket. It is designed to work inside your home or business providing electricity if the power goes off.

Salicru's SPS ADVANCE T series offers, as a UPS solution, optimum levels of efficiency and reliability for all critical devices that require power supply continuity and dependability. They come in a very compact tower format to save space in server and computer rooms. They also feature line-interactive technology to combat any fluctuations in the mains [???]

We supply 12V 100Ah Deep Cycle Gel batteries for the Smart Power Systems on EcoDepot. The SPS-1000 can typically run a modern flat screen LCD TV(100W), a laptop(50W), a DSTV decoder(50W) and a low energy lamp(20W) for about 10 hours. All devices plugged into the SPS-1000 are protected from damaging surges and spikes.

Salicru's SPS PC series is an Uninterruptible Power Supply (UPS) system featuring Line-interactive technology which provides the best protection solution for equipment and information within home and professional (small businesses, offices, shops, etc.) computing environments.

To meet the challenge of high efficiency and power density, Fairchild Semiconductor developed the smart power stage (SPS) module family - a next-generation, ultra-compact, integrated MOSFET plus

8. Optionally connect the RS-232 DB9 Female connector to a PC for remote control of the SPS-1000. 9. Optionally connect an Ethernet cable to the TCP/IP port on the SPS-1000 to a Local Area Network for remote control of the SPS-1000. 10. Power on all of the signal sources connected to the SPS-1000 11. Power on the SPS-1000.

Key Features High performance DC linear power supply Ultra Low Noise Regulator Circuit Output short Protection circuit Over-Temperature Protection circuit The sPS-1000 is a high performance DC linear power supply which connects with audio devices using DC power to maximize the sonic performance. It is designe
