A top post battery was used in this job. If your
vehicle has a side terminal battery, the steps will be
much the same. Side terminal batteries do not have
top posts. The terminals are molded into the side
wall of the battery and they use a different style of
battery cable end.

Based on the images, I think the real question is: does the Fitness app track steps when Watch battery dies? And I don't know. Fitness app will track steps if you don't have an Apple Watch. But, guessing here, if one does have a Watch, Fitness app will not use phone's steps. Or probably more accurately, won't record via the sensors.
