

Is Mali ready to scale up renewables?

The Ministry, working through the Mali Renewable Energy Agency (AER-Mali), has initiated a partnership with the International Renewable Energy Agency (IRENA) to assess Mali's readiness to scale up renewables.

Who is IDD energy consultancy?

IDD Energy consultancy Limited is a leading provider of comprehensive energy management solutions for major enterprises, helping them save expenses and consumption. a selection of our

What are the main sources of electricity in Mali?

At present, thermal and large-scale hydropower plants are the main sources of electricity supply on the national grid. Renewable energy could provide the most competitive form of power in Mali due to today's advanced technological reliability, declining technology costs and high resource potential.

Does Mali have a good energy sector?

Mali's positive track record in developing its energy sector, evidenced by its introduction of various renewable energy technologies as well as its efforts to create a welcoming enabling environment, are also discussed in the report.

How many people in Mali have access to electricity?

In Mali, less than half of the population has access to electricity, whereas in rural areas access is limited to only 16.7% of the population. In terms of modern fuels, access is extremely low, at only 2% and 3% for rural and urban areas, respectively. Energy access is widely recognised as essential to improve economic welfare.
