

Located some 180 km west of Bamako, in Mali's Kayes Region, this 50 MWp solar plant injected its first kilowatt-hours into the Malian power grid in March 2020. The Kita solar plant is actively participating in the increase in the country's electrification rate, an essential parameter for economic and social development.

Southwestern Mali alone has 53 gigawatts (GW) of solar potential, enough to satisfy expected power demand for the whole country. Yet today, more than half of Mali's 19 million people still lack modern energy access.

Touna Solar Power Station, is a planned 93 MW (125,000 hp) solar power plant in Mali. The privately owned power plant is expected to sell the power produced to the national electric utility, Energie du Mali (EDM-SA), under a power purchase agreement, which has already been signed, as of December 2020.

Mali's President Assimi Go?ta has launched a 200 MWp solar power plant project with NovaWind, a Rosatom subsidiary, to address the nation's electricity crisis and promote sustainable energy. The ???200 million investment aims to supply 10% of Mali's electricity within 12 months.

At Kaba Solar, we're on a mission to accelerate the adoption of solar energy in Mali. Our top-of-the-line solar equipment and expert installation services allow you to embrace clean, sustainable, and cost-effective solar power, while contributing to a greener planet.

The findings reveal that a substantial part of Mali's land is suitable for solar PV and wind energy projects. Specifically, the study estimates that Mali could potentially develop ???

Construction work has commenced in Mali on the largest photovoltaic solar power plant in West Africa, in a joint venture with Russia. The 200MW plant, which will cover 314 hectares in Sanankoroba, near Bamako, is ???

Construction work has commenced in Mali on the largest photovoltaic solar power plant in West Africa, in a joint venture with Russia. The 200MW plant, which will cover 314 hectares in Sanankoroba, near Bamako, is expected to boost national electricity production by 10%, according to Grigory Nazarov, director of Novawind, the subsidiary of the
