

How do power units work?

The power units transform the mains voltage to the high voltage required by the ioniser. There are different types of power units available. Power units are easily connected and operated and don't need any maintenance. The standard model has a modern styling featuring easy-access control and connection.

How many static eliminators can be connected to a power unit?

Up to 4 static eliminators can be connected. This power unit is equipped with two high-voltage transformers with 180° phase-shifted output voltages. As a result, the anti-static bars connected to the power unit produce positive and negative ions simultaneously.

What are the different types of power units for anti-static equipment?

Connectable main voltages are 110V AC and 230V AC. Connectable frequencies are 50 and/or 60Hz. There are different types of power units available. Power units are easily connected and operated and don't need any maintenance. Below you find the different types of power units for anti-static equipment produced and delivered by Simco-ION.

Which power units can be used as input for AC static eliminators?

All anti-static power units can be used as input for the AC static eliminators. All power units have multiple, different output connections depending on the type of power supply chosen. A-Unit - General power unit for all AC-static eliminators 3.3 - 7kV*. LB2A4S - Special power unit, generating negative and positive ions simultaneously 3.3 - 7kV.

What is SPECI Simco-ion Chargemaster VCM?

Speci Simco-Ion's Chargemaster VCM is programmable for either voltage or current control mode to supply the high voltage for charging bars and various charging applicators used to electrostatically bond materials.

How to connect a power unit?

One of the following methods: For power unit mounted on machine, connect the power unit ground stud and earth ground with at least a #16 AWG copper wire. All power units are equipped with a 3-conductor line cord. For power unit with 120 VAC operating voltage, the line cord is fitted

Active ionisation equipment operates on high voltage. The power units transform the mains voltage to the high voltage required by the ioniser. There are different types of power units available. Power units are easily connected and operated and don't need any maintenance. The standard model has a modern styling featuring easy-access control and

The F267 (230V) is among Simco-Ion's most popular power supplies. They can power a variety of shockless static eliminators, including the HS Nozzles (up to 100 nozzles in series), and MEB Bars. The units' compact size and budget friendly price make them customer favorites. F267 : Input Requirements: 230V, 50/60 Hz: Output Voltage: 7 kV, 3mA max

The MultiPowerMaster (MPM) is an addition to the range of high voltage powers units. It features electronically stabilized output voltage and a wide range of input voltages. Input voltages range from 100-240 V AC, 50-60 Hz. Output voltage is ???

Find out all of the information about the Simco-Ion product: anti-static equipment power supply controller A Unit. Contact a supplier or the parent company directly to get a quote or to find out a price or your closest point of sale.

The N167 (120V) and N267 (230V) are Simco-Ion's most versatile power supplies. They can be used with several shockless static bar models (R50 Bar and MEB Bar). A terminal block connector inside the power supply allows for the connection of up to four static eliminators to one power supply. The units accept either shielded or unshielded cable.

Simco-Ion Power Unit 47 : Pioneer in cleanroom supply & equipment, and ESD control products to electronic, food, pharmaceutical, plastic, and automotive industries for over 25 years. Power Supply. Simco-Ion Power Unit 47. For use with TN2, TN2R, ES Gun, and HS-2 Nozzle. Fault Detection Circuit. Weight: 5 kg. Electrical Input: Universal.

simco a2c7s power unit simco an illinois tool works company power unit type: a2c7s art. nr.: 0805207000 unit nr: 050801090 input: 230vac 50/60hz 0.2a output: only for 7.0 kv devices i max.: 2.5 ma ip-54 93.30.92.8400 weight: 2.670 kg ref ???

24V Power supplies provide 24V DC output voltage to Simco-Ion devices. The supplies have a broad input voltage of 100-240V AC 50-60Hz. Models are available as desktop supply for a single device or as DIN rail supply, capable ???

These power units work with IQ Power HL Static Neutralizing Bars which are available in Speed and Hybrid configurations. IQ PowerTM HL Static Neutralizing System Simco-Ion's IQ Power Nozzle is a shockless pulse DC ionizer engineered to operate at 7 kV and is compatible with the IQ Power Static Neutralizing System. Can be used with

In it you will find data highlights on specific health topics, demographics and geographies presented through interactive Power BI dashboards and other resources, such as reports and maps. Use the dashboards to find and filter statistical ???

Power Unit 150 from SIMCO JAPAN. MISUMI offers free shipping, free CAD downloads, short lead times, competitive pricing, and no minimum order quantity. Purchase Power Unit 150 from SIMCO JAPAN now. MISUMI | Your Time, Our Priority. 7 Million Products, 2,000 Brands.
