

Our solar projects are intended to provide useful services to those in need, especially in remote locations such as the Marshall Islands. We have been providing solar power systems to schools, hospitals, community halls, churches and homes all over the Marshall Islands.

After the project is completed, it can effectively increase the ratio of renewable energy consumption in the Marshall Islands, bringing the share of renewable energy to 7%, and greatly improving the power supply in the capital area.

Ideally tilt fixed solar panels 7° South in Majuro, Marshall Islands. To maximize your solar PV system's energy output in Majuro, Marshall Islands (Lat/Long 7.091, 171.3765) throughout the year, you should tilt your panels at an angle of 7° South for fixed panel installations.
