The school is partnering with Green Energy Solutions, a local solar and energy efficiency company, on the design and installation of the solar plan. This initial phase has three components: ??? Solar hybrid 18,000btu air conditioners that will be powered by solar panels now being installed on the elementary building roof.

Our solar projects are intended to provide useful services to those in need, especially in remote locations such as the Marshall Islands. We have been providing solar power systems to schools, hospitals, community halls, churches and homes all over the Marshall Islands. On many of these islands there is no central power grid, and therefore

The Marshall Islands consists of 29 atolls and 5 islands, the majority of which are not electrified, have an unreliable energy source, and pay very high fuel costs.

Under the National Energy Policy and to address the challenges associated with fossil fuel dependence, the Marshall Islands implemented its outer island solar project, setting a target of 100% renewable energy electrification. The project resulted in 95% solar electrification of all outer island public facilities and households and, building on that success, the Marshall Islands has ???
