

We, the participants of the Martinique Conference on Island Energy Transitions, have met in Martinique on 22-24 June 2015 to advance the goal of unlocking and mobilizing the human, financial and technical and natural resources that are ???

Targets Renewable Energy Energy Efficiency Transportation In Place Proposed Prepared by the National Renewable Energy Laboratory (NREL), a national laboratory of the U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy; NREL is operated by the Alliance for Sustainable Energy, LLC.

Martinique has a high solar potential and set a renewable energy mix target of 100% by 2030. Presently Martinique energy mix is comprised of 25% renewable energy on the public grid. Its electrical demand peaks at 235MW and its electricity prices are very high relative to ???

Martinique could benefit by diversifying its energy portfolio to include more nuclear, wind, and solar energy. Investing in these technologies, as proven by other nations, can significantly reduce dependence on fossil fuels and enhance the island's energy security.

With the 14MW Grand-Rivi?re wind park inaugurated last month, and further projects on the way, Martinique has been making strides towards achieving its goal of being energy self-sufficient by relying on renewable energy by 2030.

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass ??? the burning of charcoal, crop waste, and other organic matter ??? is not included.

Depuis plus de 13 ans, HELIOS ECO ENERGY, entreprise spécialisée dans les énergies renouvelables en Martinique (972), conçoit et commercialise des offres dans le domaine du solaire photovoltaïque et de l'éolien pour les particuliers, les professionnels et ???
