The Relentless Pursuit of Perfection Cutting-edge Technology - HY Energy has been investing capital and efforts in R& D and manufacturing workmanship every year in order to improve wind turbine efficiency and reliability. We are putting efforts to develop and implement wider application fields of wind turbine and wind-solar hybrid system; we are becoming the pacemaker of world ???

HY Energy Co., Ltd has made tremendous contributions to improve national wind generator manufacturing level under the breakthrough technique on wind turbine design conception and production craft since 2001, meanwhile, our breakthrough technique on wind-solar hybrid power system has also led a large scale application in real circumstance.
