Solarworx provides a smart, unique and modular decentralized DC microgrid for rural African communities. Based on state-of-the-art IoT and power-electronic control technology, Solarworx wants to create the next generation of solar home systems and connect the 1.2 billion people around the world living without access to electricity.

Solego est un appareil DC, ce qui signifie que tous les appareils DC de 5 et 12 V peuvent être alimentés. Si vous devez alimenter vos appareils AC, vous aurez besoin d'un onduleur mais nous ne recommandons que des onduleurs de haute qualité et de respecter la puissance maximale.

Since the initiation of SolarWorX Felix is in charge of product and business development. He previously worked as an environmental engineer for clean-tech companies in the wind and off-grid energy sector. More recently he focused on Solar Home Systems development and management in East Africa and therefore speaks Kiswahili fluently
