A 15MW/10.4MWh battery energy storage system is to be built in Tahiti, helping the French territory in the heart of the Pacific save millions from the replacement of diesel generators, and help reach its target of 75 per cent renewables by 2030.

Siemens is helping the French Polynesian island of Tahiti reduce its reliance on diesel fuel as part of a wider plan to help decarbonise the island. Currently, around 36 per cent of Tahiti's electricity supply comes from renewables ??? 30 per cent from hydro-electric stations, and 6 per cent from solar PV.

The government of New Caledonia, a French overseas territory in Polynesia, has given the green light to the construction of a 50-MW/150-MWh battery energy storage system (BESS) by domestic renewable power producer and developer Akuo.

GSL ENERGY announced that the company has supplied home solar energy storage system for a Polynesia's solar off grid project, which is installed with a capacity of 20kwh Lifepo4 Lithium ???

The government of New Caledonia, a French overseas territory in Polynesia, has announced plans for a 150MWh battery energy storage system (BESS) to be deployed by IPP Akuo Energy. Authorities have enlisted Akuo, a developer and independent power producer (IPP), to deploy the system which will have a discharge duration of three hours, a state

By processing batteries on site, the Be Energy center is also contributing to French Polynesia's energy autonomy, a key objective as part of its ecological transition. By extending the life of batteries, it reduces dependence on imports and limits greenhouse gas emissions linked to waste transport.
