MC Cube . World's first BESS using the Blade Battery, highly integrated with ultra high energy density. MC Cube ESS . 20ft ESS . Standard 20ft container design, 1/2/8 channel output supported, applicable in 1C/0.5C scenarios, fully compatible with diversing PCS, minimize the maintenance space.

Manufacturing of BYD's Blade Battery. Image: BYD. Chinese EV giant BYD has launched what an executive claimed is the "world's first high-performance" sodium-ion BESS product, using its proprietary form factor Long Blade Battery cell.

The CUBE MC Diesel dispenser is installed on anti-vibration mounts for better comfort and practicality in use, while the mechanical seal and the thermal protection against overheating of the induction motor make the product reliable and safe. The nozzle supplied is automatic with a swivel connection and the nozzle holder has a pump start/stop

The BYD MC Cube-T has a capacity of 6.432 MWh, and the upgraded capacity will reshape the value of energy storage, it said today in a post published on its WeChat account. The product uses BYD's new generation of high-capacity, long blade batteries with up to 11 percent higher individual cell energy and up to 35.8 percent higher system energy

Standard outdoor battery cabinet, MC Cube-T uses the new-generation LFP battery for energy storage, and adopts the world's first CTS (Cell To System) integration technology, small changes, large capacity.
