

Testing Solar Power Banks. I left solar power banks from BioLite, Blavor, 4Patriots, and Hiluckey on my patio for four days to see how well they charged. None of them (except one) got past the first blue blinking dot. Even when I propped up the solar power banks at the same angle as some of the best portable solar panels, it never amounted to much.

Once a portable charger runs out of juice, you have to find an outlet to repower it. Solar power banks, however, help you avoid that problem ??? they can be repowered by the sun. Like solar chargers, the devices feature built-in solar cells that capture sunlight and convert it into electrical energy to charge devices.

The Nitcore 5000 mAh power bank is an 18 Wh cell, which means it will take about 5-9 hours to fully charge the power bank using the solar panel. That means that after one day of hiking in the American west you will typically have significantly more power available for your needs than if you running the NB10000 (one 5000 mAh cycle + 1 charge).
