

Why do people live off-grid in Mexico?

For one couple, the desire to simplify their lifestyle led them to create a situation that facilitated an entirely 'off-grid' living experience in Mexico, reducing their material possessions to only what they need and becoming enthusiastic conservationists. Fernando and Eva (pictured above) grew up and lived in modern European cities.

Should you take yourself off the grid?

Taking yourself off the grid is particularly appealing in a country where the mains electricity isn't reliable. One developer I've known for some years on the Yucatan peninsula of Mexico has launched a second sustainable, off-the-grid community (this after completing a similar and successful first project).

Is there a sustainable off-the-grid community in Mexico?

One developer I've known for some years on the Yucatan peninsula of Mexico has launched a second sustainable, off-the-grid community (this after completing a similar and successful first project). This new development is Los Arboles Cob and is 20 minutes inland from Tulum in the heart of Mayan country.

What can I do if I'm not on the grid?

Get off the grid and learn to live self sustainability. Build an earthship (earth ship), container home, sand bag home, or reinforced concrete, eco block, or a traditional home. We grow organic food and farm organic cattle and sheep. We use the voisin grazing method for our pastures. We are also starting an Agriclub.

Is living off-grid a good idea?

Living off-grid attracts two different kinds of personalities--those who want to do their part to save the planet and reduce their carbon footprints...and those who want the security of not having to rely on "the system" for their utilities. Taking yourself off the grid is particularly appealing in a country where the mains electricity isn't reliable.

How do I choose to live off-grid?

Choosing to live off-grid intentionally requires considered thought, and detailed planning. Through years of living off-grid Fernando and Eva have accumulated direct experience and intricate knowledge of the very practical day-to-day advantages and challenges of living this way.

Get off the grid and learn to live self sustainability. Build an earthship (earth ship), container home, sand bag home, or reinforced concrete, eco block, or a traditional home. We grow organic ???

Julie and Lurko's journey is filled with obstacles overcome and hopefulness in the face of change and difficulty. Are you cut out to live off-grid in the jungles of Central America? Read on to find out. Julie, Nayarit, Mexico:

Thinking about going offgrid in Mexico? A project has relaunched this year in a much better location in Mexico and is offering presale plots! It's a membership based project to be set up like a camping site with shared roads and buildings.

I am putting together plans to make the property I own in Mexico off the grid. There are a lot of other things I plan to do, but right now I am looking at wood gasifiers. My thoughts are to grow sugarcane and/or bamboo and use that to fuel the gasifier.

Taking yourself off the grid is particularly appealing in a country where the mains electricity isn't reliable. One developer I've known for some years on the Yucatan peninsula of Mexico has launched a second sustainable, off-the-grid community (this after completing a similar and successful first project).

These are some of the key questions to contemplate when you're considering an "off-grid" lifestyle in Mexico: Is off-grid living a workable option for you, given your personal circumstances? Is Mexico the right country for you, and what locations in Mexico make good off-grid living locations?
